

## Abstract

### 1. Introduction

### 2. Climate change

#### 2.1. Definition

Providing the definition of climate change, including information about what it is, how it happens, what its impacts are, ...

#### 2.2. Current situation

Giving several current statistics about climate change. It is required that these statistics come from trusted sources.

#### 2.3. Mitigations by authorities

Listing some actions taken by countries and organizations.

#### 2.4. Dataset

Showing the main dataset used in this project.

### 3. Methodology

#### 3.1. Exploratory analysis

Providing graphs and insights of features in dataset.

#### 3.2. Mining correlated features

Task 1 - related

#### 3.3. Predictive models

Task 2 - related

### 4. Result analysis

#### 4.1. Interpretation

Providing some comments about the results.

#### 4.2. Possible mitigations

Proposing some mitigation measures derived from the results.

### 5. Conclusion
